

7.9. Additional Resources

A series of handouts on weather recording and interpretation are presented. These are strongly based on material prepared under an earlier MAF SFF Project; Research to Practice: Weather recording and interpretation for fruit industries. This project was lead by David Manktelow of HortResearch and Alan Porteous of NIWA.

Some of the handouts have been updated, others completed and some adapted to have more relevance to the field cropping sectors.

7.9.1. List of Titles

Weather Monitoring

- 1 Hardware
- 2 Temperature
- 3 Surface wetness
- 4 Humidity
- 5 Light
- 6 Wind

Weather and Climate Scales

- 1 MacroClimate
- 2 MicroClimate

Weather Forecasting

- 1 Weather forecasts and microclimate
- 2 Weather v's Climate Forecasts
- 3 Reading a Weather Map

Other Information

- 1 Measuring Chilling units
- 2 Measuring Heat Units
- 3 Weather and Disease
